

CSIP RESEARCH FORUM

*Science, technology and innovation
is essential in shaping our future.
Translating the narrative into clear
options, strategies and outcomes is
necessary, but far from simple.*

Thursday, February 14
11:30 a.m. - 12:30 p.m.

U of S location: Canada Room,
Diefenbaker Building

U of R location: CB330, College Avenue
Campus

The Centre for the Study of Science and Innovation Policy (CSIP) invites all students, faculty and researchers interested in the study of science, technology and innovation policy to participate in a bi-weekly research forum. Each forum involves a quick roundtable of introductions, a review of topical policy issues, one or more brief research reports and general discussion about research strategies and methods that are being or could be used to examine various angles of the policy system. You can simply drop in and listen or offer to present some of your findings.

Creating the World's First Super Smart Society: Japan's Society 5.0

PRESENTED BY: Carin Holroyd, Associate Professor, University of Saskatchewan

Japan has one of the world's most aggressive and creative strategies for capitalizing on the potential of digital and scientific innovations. Japan's "Super Smart Society" strategy, referred to as Japan 5.0, aims to "resolve various social challenges by incorporating innovations of the fourth industrial revolution into every industry and social life." (Japan 5.0). With the expansive and comprehensive Smart Society agenda, Japan has approached the age of technology as an opportunity to address societal challenges while also building a foundation for economic growth and international trade.
