

CSIP RESEARCH FORUM

Science, technology and innovation policy is essential in shaping our future. Translating the narrative into clear options, strategies and outcomes is necessary, but far from simple.

Wednesday, May 20
12:00 - 1:00 p.m. (CST)

Delivered by Zoom.

COVID-19 and the Energy Transition in Canada

PRESENTED BY: Martin Boucher, JSGS Lecturer

This presentation will focus on the recent COVID-19 pandemic and its implications on climate change and the energy transition. What can we learn from the global response to COVID 19? How will global GHG emissions be impacted? How should we think about energy policy in Canada moving forward?

The Centre for the Study of Science and Innovation Policy (CSIP) invites all students, faculty, researchers, and citizens interested in the study of science, technology and innovation policy to participate in a bi-weekly research forum.
